PROFESSIONAL SUMMARY

I am a skilled Frontend Developer with 5 years of practical experience in creating dynamic, user-centric web applications. My approach combines robust technical expertise with a keen awareness of design principles and usability standards. Throughout my career, I have successfully delivered projects from conceptualization to deployment, taken charge of frontend architecture, and worked collaboratively with cross-functional teams to ensure seamless digital experiences. I excel at transforming intricate challenges into clean, intuitive interfaces and am committed to continuous improvement in performance, accessibility, and code quality.

TECHNICAL SKILLS

- Proficient in JavaScript (ES6+) and TypeScript
- Experienced in React.js and Vue.js frameworks
- Expertise in HTML5, CSS3, and SCSS for modern, maintainable styling
- Advanced knowledge in Responsive and Adaptive Design techniques

- Skilled in Redux, Pinia, and comprehensive State Management solutions
- Integration of RESTful APIs using Axios and Fetch
- Version control with Git, and experience in CI/CD pipelines, Webpack, and Vite
- Strong background in Testing with Jest and React Testing Library
- UI/UX design capabilities using Figma and Adobe XD
- Deep commitment to Accessibility (WCAG, a11y) and SEO best practices
- Specialized in Performance Optimization for web applications
- Familiarity with Agile and Scrum methodologies

PROFESSIONAL EXPERIENCE

Nigerian Airspace Management Agency (NAMA) | Ikeja, Lagos

Software Developer (Intern) | April 2023 – October 2023

- Developed and launched over 8 responsive web applications, resulting in a significant 35% increase in user engagement due to enhanced UI/UX design.
- Created reusable UI components and established design systems, which streamlined development workflows and reduced the time required for new frontend projects by 25%.
- Led the seamless integration of frontend codebases with RESTful APIs, and implemented thorough testing and validation processes that reduced API-related bugs by 40%.

- Optimized application performance and loading speeds, achieving sub-2-second load times for all major projects, thereby improving user satisfaction.
- Championed accessibility enhancements, ensuring that all applications adhered to WCAG standards and delivered improved usability to every user.
- Authored and maintained comprehensive automated test suites, raising code coverage to 85% and minimizing post-deployment issues.
- Actively collaborated with designers and product managers within agile sprints, consistently meeting deadlines and achieving key project milestones.
- Provided mentorship to two junior developers, guiding them in React best practices and accelerating their onboarding, which led to a 20% improvement in team productivity.

PROJECT EXPERIENCE

CHEL CAFE (Ongoing)

Live: <https://chel-cafe.netlify.app/>

Designed and engineered a contemporary, fully responsive cafe website. Integrated advanced state management strategies and seamless API connections to facilitate dynamic menu updates and online ordering capabilities.

SEMAILER UPDATED CLONE (Completed)

Live: <https://seamailer-clone-by-lovethrech.netlify.app/>

Replicated and enhanced a sophisticated email client user interface, focusing on achieving pixel-perfect design, developing reusable components, and ensuring cross-browser compatibility for a consistent user experience.

ROOM HOMEPAGE (Completed)

Live: <https://taupe-frangollo-ca01c4.netlify.app/>

Constructed an interactive landing page featuring smooth transitions and optimized images, which contributed to elevated performance metrics and greater user engagement.

SUNNYSIDE LANDING PAGE (Completed)

Live: <https://lovethrech-sunnyside.netlify.app/>

Built a visually compelling marketing website, ensuring strict adherence to SEO best practices and comprehensive accessibility compliance to reach a wider audience.

CARD DETAILS FORM (Completed)

Live: Chel's DayTwo Challenge--Daily UI

Designed and implemented a secure, intuitive credit card form that offers real-time input validation and clear user feedback, thereby increasing conversion rates.

PROJECT TRACKING LANDING PAGE (Completed)

Live: <https://lovethrech-projects-tracking-page.netlify.app/>

Developed a project tracking dashboard leveraging advanced state management and data visualization libraries, enabling users to monitor and analyze their projects efficiently.

EXPIRIO (Completed)

Live: <https://expirio.netlify.app/>

Launched a productivity application that empowers users to manage tasks effectively, ensuring a smooth, bug-free experience and persistent data storage.

NEWSPAPER HOMEPAGE (Completed)

Live: <https://lovethrech-news-homepage.netlify.app/>

Created a media-rich homepage with optimized loading speeds and adaptive layouts for seamless access across all device types.

QUIZ APP (Completed)

Live: <https://lovethrech-quizapp-using-vue.netlify.app/>

Developed a single-page quiz application with Vue.js, offering instant feedback and a streamlined, mobile-first interface for enhanced usability.

NOTE APP (Completed)

Live: <https://loveth-noteapp.netlify.app/>

Engineered a notes application featuring offline support and persistent state management, providing users with a reliable and convenient experience.

EDUCATION

Bachelor of Science in Computer Science

Bells University of Technology, 2019
