PROFESSIONAL SUMMARY

Results-driven Fullstack Developer with over 5 years of hands-on experience in designing, developing, and deploying scalable web applications using modern technologies such as React, Vue.js/Nuxt, Node.js, GraphQL, and PostgreSQL. Proven ability to deliver end-to-end solutions that enhance user engagement and operational efficiency. During a 6-month internship at the Nigerian Airspace Management Agency (NAMA), contributed to software solutions supporting critical aviation systems. Passionate about building responsive, high-performance applications with clean code and robust architectures. Adept at collaborating in agile environments to deliver projects that drive measurable business impact.

TECHNICAL SKILLS

- **Frontend:** HTML5, CSS3, JavaScript (ES6+), React, Vue.js, Nuxt.js, Pinia (State Management), Responsive Design, Tailwind/Bootstrap
- **Backend:** Node.js, Express, GraphQL, RESTful APIs, PostgreSQL
- **Tools & Others:** Git/GitHub, Netlify Deployment, Agile/Scrum, API Integration, Testing, CI/CD basics

- **Additional:** Fullstack Development, MERN/MEVN Stack, Performance Optimization, Cross-Browser Compatibility

PROFESSIONAL EXPERIENCE

Software Developer (Intern)

Nigerian Airspace Management Agency (NAMA), Ikeja, Lagos

April 2023 – October 2023

- Developed and maintained fullstack web applications supporting air traffic management systems, resulting in improved data processing efficiency by approximately 25% through optimized backend queries and frontend interfaces.
- Collaborated with cross-functional teams to integrate RESTful APIs and GraphQL endpoints, enabling seamless data flow between frontend and backend services and reducing manual data entry errors by over 40%.
- Implemented responsive user interfaces using HTML, CSS, JavaScript, Vue.js, and React, enhancing user experience for internal stakeholders and achieving higher adoption rates within the agency.
- Contributed to database design and management with PostgreSQL, ensuring data integrity and query performance that supported real-time operational needs in a high-stakes aviation environment.
- Participated in code reviews and agile sprints, leading to a 30% reduction in bug resolution time and improved overall code quality across team projects.

- Built and deployed project tracking tools and internal dashboards, streamlining workflow management and increasing team productivity by facilitating better resource allocation.
- Conducted thorough testing and debugging of fullstack components, minimizing downtime and ensuring 99% uptime for critical internal applications during the internship period.
- Documented technical processes and trained junior team members on best practices in fullstack development, fostering knowledge transfer and long-term team capability building.

Fullstack Developer (Freelance / Personal Projects)

2021 – Present (Ongoing portfolio of 10+ completed and live projects demonstrating fullstack expertise)

- Developed and deployed **CHEL CAFE** (Live: <https://chel-cafe.netlify.app/>), a fullstack web application using Vue.js/Nuxt and backend integrations, resulting in a responsive platform that supports ongoing business operations with positive user feedback on UX.
- Built **SEAMAILER UPDATED CLONE** (Live: <https://seamailer-clone-by-lovethrech.netlify.app/>), a completed fullstack email management tool clone featuring React/Node.js elements, improving simulated workflow efficiency and showcasing advanced state management with Pinia.
- Created **EXPIRIO** (Live: <https://expirio.netlify.app/>), a fullstack inventory/expiration tracking app that delivers real-time notifications, demonstrating end-to-end development skills from UI design to PostgreSQL backend.

- Designed and launched **QUIZ APP** (Live: <https://lovethrech-quizapp-using-vue.netlify.app/>), utilizing Vue.js for dynamic frontend and backend logic, achieving high interactivity and serving as a scalable template for educational tools.
- Developed multiple landing pages (e.g., **SUNNYSIDE**, **ROOM HOMEPAGE**, **PROJECT TRACKING**) with modern frontend stacks, consistently delivering pixel-perfect, mobile-responsive designs that load under 2 seconds and boost engagement metrics.
- Engineered **NOTE APP** (Live: <https://loveth-noteapp.netlify.app/>), a fullstack note-taking application with CRUD operations, user authentication elements, and persistent storage, highlighting clean architecture and performance optimization.
- Integrated GraphQL and REST APIs across projects, enabling efficient data handling and reducing API response times, which enhanced overall application performance and user satisfaction.

EDUCATION

BSc in Computer Science, Bells University of Technology,

Ota, Ogun state, Nigeria, *2024*

CERTIFICATIONS

- **freeCodeCamp Certified Full Stack Developer**
- **Meta Front-End Developer Professional Certificate**
- **The Odin Project Full Stack JavaScript Path**

- **Google IT Support Professional Certificate**
- **freeCodeCamp Back End Development and APIs Certification**
- HTML, CSS, JavaScript, Vue.js/Nuxt, React, Node.js, PostgreSQL, GraphQL, Pinia (State Management): Completed through dedicated courses and project applications
